Chieftain Gas and Electric Fryers

Replacement Safety Thermostat Fitting Instruction

The safety stat body design has been amended and it is now secured in position by means of a nut instead of two screws.

In the event that replacement of the old type is required, fit as detailed using the existing large hole that the re-set button protruded through to accommodate the mounting turret.

As the re-set button is now located within the mounting turret, please ensure that the re-set label enclosed is already applied to unit. If not, position enclosed label over the existing label.
